### Profile

I am a game programmer. I love making games and I have 3+ years of experience in game development. Since I can remember, I've been a huge fan of video games, and I've been fortunate enough to make my passion my profession.

My passion for programming has only gotten stronger throughout the course of my career as I've encountered new difficulties while trying to make fantastic video games that players would enjoy. Working in new development areas helps me continue to improve my programming skills.

Now I am making games using SDL2 with C++ and learning Unreal Engine 5.

### Education

Bachelor of Computer  
Applications  
[2020 - present]  
The Oxford College of Science,  
Bangalore, India

### Experience

#### Game Programmer

ZippyCreativeStudio • Internship  
November 2021 • 1 month

I have learnt many new things while working in hyper casual games like object pooling and modular code.
