I am a game programmer. I love making games and I have 3+ years of experience in creating and learning game development. Since I can remember, I've been a huge fan of video games. My passion for programming has only gotten stronger throughout the course of my career as I've encountered new difficulties while trying to make fantastic video games that players would enjoy. Working in new development areas helps me continue to improve my programming skills.

EXPERIENCE

ZippyCreativeStudio • Internship
November 2021 • 1 month
Unity | C#
I have learnt many new things while working in hyper casual games like object pooling and modular code.
